Speaker Biography

Deepak K Babu

CEO | Sabhya Technologies

Deepak is a highly accomplished technology executive with deep expertise in software development, data science, and artificial intelligence. As the CEO of Sabhya Technologies, a Brookfield-based software company specializing in solutions for the small manufacturing sector.

Agenda

- 1 The Reality in 2026
- 2 The Core Problem
- 3 **What can we do TODAY**
- 4 Customer-Led Strategy
- 5 Solution Architecture
- 6 **Why This Approach Wins**

Key Takeaways

- AI is available on Prem with extend Kinetic
- Use AI at the customer layer, not inside ERP
- Automating service intake delivers the fastest ROI
- Mobile + ERP integration creates a closed-loop system
- Secure APIs enable innovation without risking your core system
- Building custom AI today prepares you for Epicor Prism
- Start small, prove value, then scale across the business

The Reality in 2026

Classic UI is
retired

Majority still
on on-prem
Kinetic

Service
workflows
remain
manual

AI adoption
is still
fragmented

The Core Problem

When your customer reach out...

Manual
service intake
(emails, calls)

No structured
data capture

Field teams
disconnected
from ERP

ERP
underutilized
as system of
record

Impact:

- ⚠ Slow response times
- ⚠ Poor customer experience
- ⚠ Limited scalability

What can we do TODAY?

⚙️ Customer-Led Strategy

Start at the customer interaction layer

Build inward toward
ERP

Use AI as interface, not
replacement

****Principles****

- 
1. Preserve Kinetic core
 2. Extend via APIs
 3. Design for AI Readiness

Solution Architecture

Epicor Kinetic

On-Prem/Cloud

Website + AI Agent

Natural Language

Mobile Service App

Real-time Sync

Integration Layer

Functions + REST APIs

Website + AI Agent

Converts customer intent into structured requests

- ✓ Natural language → ERP-ready data
- ✓ Automated service intake
- ✓ Intelligent parsing and validation

Customer request → AI parsing → Case creation

Epicor Integration

Epicor to orchestrate workflows

- ✓ Case creation
- ✓ Validation
- ✓ Status updates

24x7 Coverage

Mobile Service App

Technician capabilities

- ✓ View jobs
- ✓ Update status
- ✓ Capture notes
- ✓ Sync in real time

Real-time ERP updates • Single source of truth

End-to-End Workflow

Before

- Customer
- Email
- Manual Entry
- Delays

After

- Customer
- AI Agent
- Auto Case
- Mobile Execution
- ERP Sync

Results

-  60-80% Reduction in manual entry
-  Faster service cycles
-  Improved data quality

⚡ Pathway to Prism

Custom AI as proving ground

- ✓ Clean data structures
- ✓ Defined workflows
- ✓ AI-ready processes

Preparing the organization for next-gen ERP capabilities

Security & Architecture

- ✓ API gateway / middleware layer
- ✓ Authentication & access control
- ✓ No direct database exposure

Why This Approach Wins

UI Upgrade Only
→ Cosmetic

Full Migration →
Expensive, risky

Customer-Led
Extension →
Incremental,
scalable

The middle path with highest ROI

In Summary..

AI is available on Prem with Kinetic

Use AI at the customer layer, not inside ERP

Automating service intake delivers the fastest ROI

Mobile + ERP integration creates a closed-loop system

Secure APIs enable innovation without risking your core system

Building with AI today prepares you for Epicor Prism

Start small, prove value, then scale across the business
